

CTWorks partner with Mircom Zahra to launch IoT Solutions in the MENAI region

CTWorks, a leading silicon valley technology company has tied up with Dubai, based Mircom Zahra Security System LLC, a leading ELV Systems Integrator to bring cutting edge **Internet of Things (IOT)** solutions to the Middle East and North Africa (MENAI) regions.

The Internet of Things solution employs advanced analytics and workflow based solutions to improve customers **Mean Time To Repair (MTTR)** needs and optimize operational expenses (OpEx).

With decades of experience in building sensor based applications, Cloud, Analytics and Internet Software, CTWorks has developed an IoT platform to bring "**Just in Time automation**" advanced workflows and analytics solutions.

Using the flexible features of the IoT platform, CTWorks offers fine granular services in Pay as you Go model that requires no upfront capital investment from their building owners. The cloud services from CTWorks include **Test as a Service (TaaS)** to automatically test sensors and devices periodically to ensure safety standards compliance maintenance and reporting requirement. **Data as a Service (DaaS)** automates data collection, normalization and storage and data delivery for customers who would like to leverage their existing analytics solutions investments. With **Integration as a Service (IaaS)**, CTWorks offers optimized workflows, alerts, notifications and analytics and machine learning to meet customer operational optimization requirements.

"We are excited to partner with CTWorks to bring IoT enabled operational optimization solutions to our customers." "We will be in a position to offer Platinum level support at the cost of Bronze level" saving significant operational expenses for our customers says Samir Sajwani Marketing Director at Mircom Zahra.

"We are thrilled to partner with Mircom Zahra and to bring our IoT Solutions to the MENAI region. "With the close collaboration with Zahra Mircom, CTWorks will be able to replicate their customer trust and establish CTWorks as the IoT solutions platform and bring new levels of efficiency to Intelligent Buildings says "Sangam Sangameswara, CEO of CTWorks.

Let's put technology to work.
